

WHAT IS CLAIMED IS:

- 1 1. A method of displaying graphical images, said method
2 comprising:
3 retrieving a thumbtable matrix, the thumbtable matrix
4 including one or more thumbnails organized in a
5 first matrix configuration;
6 displaying the thumbtable matrix on a display window;
7 displaying a first larger image corresponding to a
8 first thumbnail on the display window
9 concurrently with the displayed thumbnails.
- 1 2. The method as described in claim 1 further comprising:
2 requesting the thumbtable matrix and the first larger
3 image from a server computer system via a
4 computer network; and
5 receiving the thumbtable matrix and the first larger
6 image fro the server computer system.
- 1 3. The method as described in claim 1 further comprising:
2 identifying a horizontal scroll configuration;
3 selecting a next scroll button;
4 determining whether the thumbtable matrix is
5 displaying a last thumbnail; and
6 scrolling the thumbtable matrix in response to the
7 determination.
- 1 4. The method as described in claim 1 further comprising:
2 identifying a vertical scroll configuration;
3 selecting a back scroll button;
4 determining whether the thumbtable matrix is
5 displaying a first thumbnail; and
6 scrolling the thumbtable matrix in response to the
7 determination.

- 1 5. The method as described in claim 4 further comprising:
2 receiving a selection corresponding to one of the
3 displayed thumbnails;
4 retrieving a second larger image corresponding to the
5 selected thumbnail; and
6 displaying the second larger image on the display
7 window concurrently with the displayed
8 thumbnails.
- 1 6. The method as described in claim 1 further comprising:
2 receiving a second matrix configuration selection;
3 displaying the thumbtable matrix corresponding to the
4 second matrix configuration selection.
- 1 7. The method as described in claim 1 wherein at least
2 one of the thumbnails are selected from the group
3 consisting of a digital picture, a video clip, and a
4 live video feed.
- 1 8. An information handling system comprising:
2 one or more processors;
3 a memory accessible by the processors;
4 one or more nonvolatile storage devices accessible by
5 the processors;
6 a graphical image display tool, the graphical image
7 display tool including:
8 means for retrieving a thumbtable matrix, the
9 thumbtable matrix including one or more
10 thumbnails organized in a first matrix
11 configuration;
12 means for displaying the thumbtable matrix on a
13 display window;

14 means for displaying a first larger image
15 corresponding to a first thumbnail on the
16 display window concurrently with the
17 displayed thumbnails.

1 9. The information handling system as described in claim
2 8 further comprising:

3 means for requesting the thumbtable matrix and the
4 first larger image from a server computer system
5 via a computer network; and

6 means for receiving the thumbtable matrix and the
7 first larger image fro the server computer
8 system.

1 10. The information handling system as described in claim
2 8 further comprising:

3 means for identifying a vertical scroll configuration;
4 means for selecting a back scroll button;

5 means for determining whether the thumbtable matrix is
6 displaying a first thumbnail; and

7 means for scrolling the thumbtable matrix in response
8 to the determination.

1 11. The information handling system as described in claim
2 10 further comprising:

3 means for receiving a selection corresponding to one
4 of the displayed thumbnails;

5 means for retrieving a second larger image
6 corresponding to the selected thumbnail; and

7 means for displaying the second larger image on the
8 display window concurrently with the displayed
9 thumbnails.

1 12. The information handling system as described in claim
2 8 further comprising:
3 means for receiving a second matrix configuration
4 selection;
5 means for displaying the thumbtable matrix
6 corresponding to the second matrix configuration
7 selection.

1 13. The information handling system as described in claim
2 8 wherein at least one of the thumbnails are selected
3 from the group consisting of a digital picture, a
4 video clip, and a live video feed.

1 14. A computer program product stored in a computer
2 operable media for displaying graphical images, said
3 computer program product comprising:
4 means for retrieving a thumbtable matrix, the
5 thumbtable matrix including one or more
6 thumbnails organized in a first matrix
7 configuration;
8 means for displaying the thumbtable matrix on a
9 display window;
10 means for displaying a first larger image
11 corresponding to a first thumbnail on the display
12 window concurrently with the displayed
13 thumbnails.

1 15. The computer program product as described in claim 14
2 further comprising:
3 means for requesting the thumbtable matrix and the
4 first larger image from a server computer system
5 via a computer network; and

6 means for receiving the thumbtable matrix and the
7 first larger image fro the server computer
8 system.

1 16. The computer program product as described in claim 14
2 further comprising:
3 means for identifying a horizontal scroll
4 configuration;
5 means for selecting a next scroll button;
6 means for determining whether the thumbtable matrix is
7 displaying a last thumbnail; and
8 means for scrolling the thumbtable matrix in response
9 to the determination.

1 17. The computer program product as described in claim 14
2 further comprising:
3 means for identifying a vertical scroll configuration;
4 means for selecting a back scroll button;
5 means for determining whether the thumbtable matrix is
6 displaying a first thumbnail; and
7 means for scrolling the thumbtable matrix in response
8 to the determination.

1 18. The computer program product as described in claim 17
2 further comprising:
3 means for receiving a selection corresponding to one
4 of the displayed thumbnails;
5 means for retrieving a second larger image
6 corresponding to the selected thumbnail; and
7 means for displaying the second larger image on the
8 display window concurrently with the displayed
9 thumbnails.

1 19. The computer program product as described in claim 14
2 further comprising:
3 means for receiving a second matrix configuration
4 selection;
5 means for displaying the thumbtable matrix
6 corresponding to the second matrix configuration
7 selection.

1 20. The computer program product as described in claim 14
2 wherein at least one of the thumbnails are selected
3 from the group consisting of a digital picture, a
4 video clip, and a live video feed.
